

CHAPTER 34

Introduction:

The questions relating to logical venn diagrams test the candidates' ability to relate and comprehend a certain groups of items and illustrate it diagrammatically. You are required to determine whether the items will form sets and their sub-sets if related or are unrelated and will form different sets. The items may be related through intersection or union of sets. Although the language and symbol of set theory diagram are never used in this type of questions, if you have studied set theory you may find questions on venn diagram relatively easier.

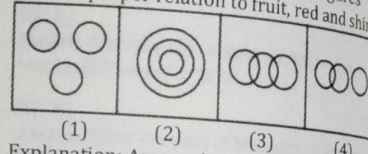

Let us see few examples related to the topic

Example 1: Which of the following diagrams correctly represents the relationship amongst Tiger, Elephant, Animal?

Explanation: Answer is option (2). Tiger is different from Elephant. But both are animals. Hence second options represent the correct figure.

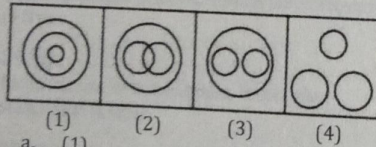

Example 2: Which of the following figures give the proper relation to fruit, red and shirt?

Explanation: Answer is option (3). Some fruits may be of red colour. Some shirts may be red colour. Fruit is different from shirt. Hence third figure gives proper relation.
